| RHS BOLT HOLE | : 14MM |
| THREAD BOLT HOLE | : 8MM |
| THREAD SLOTS | : 11MM X 18MM |
| RISE | : 175MM |
| GOING | : 250MM |
| FINISHING | : HOT DIP GALVANISED |

Made in Australia - Stair Stringers are designed to be suitable for residential / domestic / office / commercial applications with a clear span to 17 steps when installed with the use of either aluminium step treads or timber treads to a maximum of 1200mm tread width per pair. For wider tread spans a third central stringer must be used. The standard Stringers are constructed to suit 50mm treads to achieve the maximum gap of 125mm between the treads

Stair Stringers are sold as a pair. Available in 3 footing configurations as a standard product - In-Ground / Bolt-On-Concrete / Landing To Landing. All Stair Stringers are engineered to support the weight for commercial 4kPa loads. Compliant to all relevant Australian Standard Building Codes
